Summary

I have seen up close how poor UX slows people down and frustrates them—from guiding users through complex ERP software interfaces to building an application that streamlines and automates processes.

- Guided end users through complex SAP systems and created work instructions.
- Developing an application that streamlines and automates processes with a focus on accessibility.
- Works closely with designers, bridging the gap between design and development.

Work Experience

Nov 2023 - Present

Full Stack Developer
Basis Cloud Solutions, Almere / Chennai

- Developed 3 major features and 5 minor features for Anugal, a GRC app that automates security and access management. Anugal is built with HTML, CSS, JavaScript/TypeScript, React, MongoDB, and Node.js.
- Optimized data queries using MongoDB aggregation pipelines, reducing load times by 50%.
- Became the go-to person for UI-related questions within a team of 10+ developers.
- Took the lead in improving accessibility for Anugal end users and co-hosted a knowledge session on responsive design with my senior developer.
- Accelerated the development time of new features by 100% by introducing Figma Prototyping to the design team, helping to identify and resolve bottlenecks faster.
- Standardized shared React components, increasing reusability and reducing development time for new features.

Sept 2022 - Nov 2023

SAP Security & Authorization Consultant
Simac, Veldhoven

- Created and managed accounts for 15+ SAP environments.
- Performed 30+ MIC security checks on 5+ SAP production environments.
- Automated a routine MIC check using an Excel VBA script, reducing the task from 30 minutes to 5 minutes with 90% fewer errors.
- Trained client end users in security for new and existing systems.

Extra Experience

Jan 2025 - Present	**Mentor / Vrijwilliger** CoderDojoTilburg, Tilburg

- Guided groups of 20+ children and teens in coding using open-source software such as Scratch, Snap!, GDevelop, HTML, CSS, and more.
- Let the kinds choose their own tools and helped them come up with projects.

Aug 2019 - Present	**Freelance Designer**

- I enjoy taking on projects for my close circle.
- Illustrated an infographic to creatively visualize Createment's annual goals.

Education

Sept 2022 - Nov 2022	**IT Traineeship** Createment, Eindhoven

- Attended lectures by Code Nomads on Computer Science fundamentals.
- Got hands-on with coding in Java, HTML, CSS, and JavaScript.
- Achieved my Scrum Master certification.
- Completed soft skill training on collaboration, personal development, and managing stressful situations.

Sept 2015 - Jun 2019	**Bachelor Of Arts - Design Illustration & Animation** Avans Hogeschool - AKV	St Joost, Den Bosch

- Created an instructional comic about democratic elementary education for De Blink in Culemborg.
- Took a gap year after my second year of study to start my business as a freelance designer.

Hard Skills

Coding:
- HTML & CSS
- Javascript
- Typescript
- React
- NodeJS
- MongoDB
- Git

Design:
- Adobe Suite
- Affinity Suite
- Figma

Communication:
- Microsoft office
- Jira

Soft Skills

- Solution-oriented thinking
- Proactive attitude
- Ability to work independently
- Creative vision
- Puts the end user first
- Strong adaptability
